

# RSF Boosts Performance

Initial data (28 day) from Kansas State University run trial shows that SarTec's RSF program boosts animal performance. For animals on SarTec's RSF program:

- Dry Matter Intake (DMI) **increased by 1.5%**
- Average Daily Gain (ADG) **increased by 3.7%**
- Feed to Gain ratio (Efficiency) **improved by 1.6%**

The trial consists of 54 total pens of cattle (27 pens receive SarTec's RSF program and 27 pens are the control). Average cattle weight at the start of the trial was 740 pounds. All cattle were in excellent condition at the beginning of the trial. For more information on this trial contact your SarTec representative at 1-800-472-7832.

## 3-Step RSF Program

**(Receiving - Starting - Finishing)**

**Step 1:** SarStart<sup>®</sup> Drench - 50 cc at receiving

**Step 2:** SarStart<sup>®</sup> DSC or LSC - Feed 1.0 gram/hd/day for 28 days (or 2.0 cc/hd/day of SarStart<sup>®</sup> LSC)

**Step 3:** 3 options for adding to your total mixed ration (TMR):

1. SarStart<sup>®</sup> DSC at 0.5 gram/hd/day\*
2. SarStart<sup>®</sup> LSC at 1.0 cc/hd/day\*
3. SarTemp<sup>®</sup> at 5.5 oz/ton TMR\*

*\*for the remainder of the feeding period*
